PROFESSIONAL SUMMARY

Dynamic Backend and full-stack developer with over 2-years hands-on experience building and deploying production-ready web applications using Python, Django, TypeScript, React and Node.js; Proficient in core object-oriented programming and experienced in debugging legacy codebases to streamline operational proficiency. Founder of DonLabs, a web and software agency focused on building scalable backend systems, modern web interfaces, and automation-driven platforms. A professional who has built and maintained real-world applications including Vendora, a P2P vendor automation platform, alongside multiple Django and JavaScript-based web systems.

EXPERIENCE

2022

MailionDev, *Python Programmer*

- Executed automation Routines, scripting, and core object-oriented programming (OOP) principles.
- Streamlined data processing pipelines using Python, significantly reducing manual entry time and enhancing data accuracy.
- Engineered and optimised Python scripts for internal tools, boosting team productivity and operational efficiency.
- Diagnosed and refactored legacy codebases, enhancing code readability and decreasing execution time by identifying performance bottlenecks.

08/2025

Donlabs, *Founder; Developer*

- Founded and operate DonLabs, a web and software development agency focused on building and deploying modern web applications and SaaS-style products.
- Designed and developed full-stack systems using Django for backend logic and React/TypeScript for frontend interfaces.
- Implemented authentication workflows, database models, dashboards, and RESTful application logic.
- Managed end-to-end development including system design, implementation, deployment, and iteration.
- Deployed and maintained live applications using cloud hosting and modern development workflows.

02/2025 – 08/2025
Ogun, Nigeria

SmartCode Hub, *Software Development Intern*

- Assisted and contributed to the development and maintenance of web-based systems during industrial training.
- Worked with Python and the Django Rest Framework (DRF) for the design and implementation of RESTful APIs to facilitate seamless front-end integration.
- Integrated third-party services and databases (PostgreSQL/MySQL) within the Django ORM to optimise data management.
- Collaborated on the implementation of user authentication and authorization, ensuring secure access and data privacy across the platform.
- Gained practical exposure to real-world software development workflows and collaboration.

EDUCATION

2022 – 2026

Major: Computer Science | Minor: Software Engineering,
Federal University of Agriculture, Abeokuta (BSc.)

TECHNICAL SKILLS

Languages
- Python
- TypeScript
- JavaScript

Databases
- Django ORM
- Relational database modeling
- PostgreSQL
- MySQL

Frameworks & Libraries
- Django
- React
- Node.js
- Flask

Tools & Deployment
- Git & version control
- Cloud deployment (DigitalOcean, AWS, Vercel)

Backend & Web Development
- RESTful APIS
- CRUD operations
- Authentication and authorization
- Server-side development
- MVC / MVT architecture

NOTABLE PROJECTS

Vendora - P2P Vendor Automation Platform, *Founder / Developer*
- Designed and built a production-ready P2P platform that automates vendor transactions using a web dashboard and personalized Telegram bots.
- Implemented vendor configuration workflows for asset management, pricing, bank detailing, and transaction handling.
- Architected backend logic and automation flows to reduce manual legacy trading and improve transaction speed and scalability.

DevBlog - Technology News & Blogging Platform
- Built a django-based content platform dedicated to technology news and articles.
- Implemented article publishing workflows, structured layouts, and content management features.
- Designed the system to support clean separation of concerns and scalable content delivery

E-commerce Booking System - Bubbalicious Hair & Co
- Developed a React-based booking system enabling customers to schedule salon appointments.
- Implemented backend logic for booking management, form handling, and administrative workflows.
- Focused on usability and clear system flow for non-technical users.
- Re-engineered the Square booking and Payment API to fit the usecase for a seamless payment and payment-logging procedure.

LANGUAGES

English
Native

Spanish
Intermediate (working proficiency)

ADDITIONAL EXPERIENCE

Web3 community & DAO Involvement
- Served as a moderator and technical advisor for three large DAO communities
- Supported user onboarding, Tech-tool discussions, and community coordination
- X (Twitter): @_donsirmuel
